EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Dan Malley on 09/14/05.

- 2. The application has been amended as follows:
 - 1 . (currently amended) An electrical wiring system comprising:

a plug connector device configured to terminate a plurality of wires, the plurality of wires being configured to transmit electrical power provided by an electrical power distribution system; and

an electrical wiring device configured to provide the electrical power to a load, the electrical wiring device being substantially disposed between a user accessible cover member and a body member, the electrical wiring device including a receptacle disposed in the body member therein, the receptacle being configured to receive the plug device, whereby electrical continuity is established between the electrical wiring device and the plurality of wires when the plug device is inserted into the receptacle.

Application/Control Number: 10/680,797 Page 3

Art Unit: 2833

33. (currently amended) A method for installing electrical wiring, the method comprising:

installing a plurality of wires from a first location to an electrical device location, at least a portion of the plurality of wires being configure to transmit electrical power;

terminating the plurality or wires with a plug connector;

providing an electrical wiring device configured to provide electrical power to a load, the electrical wiring device being substantially disposed between a user accessible cover member and a body member, the electrical wiring device including a receptacle disposed in the body member therein, the receptacle being configured to receive the plug device; and

inserting the plug connector into the receptacle, whereby electrical continuity is established between the electrical wiring device and the plurality of wires.

Cancel claims 40-54.

55. (currently amended) A method for installing an electrical wiring device, comprising the steps of:

Application/Control Number: 10/680,797

Art Unit: 2833

a. providing a connector device that is adapted to be operably received by the electrical wiring device and that includes a first plurality of electrical contacts disposed therein;

- b. terminating the connector device to a plurality of wires, the plurality of wires being in electrical communication with said first plurality of electrical contacts;
- c. providing the <u>an</u> electrical wiring device <u>substantially</u>

 <u>disposed between a user accessible cover member and a body member</u>

 <u>having with</u> a predetermined area in which a second plurality of electrical contacts are disposed, the electrical wiring device including at least one element configured to provide electrical power to a load; and
- d. placing said connector device into electrical communication with the electrical device, wherein said first plurality of electrical contacts are in contacting relation with corresponding ones of said second plurality of electrical contacts.
- **61** . (currently amended) An electrical wiring system comprising:
- a an electrical wiring device <u>substantially disposed between a</u>

 <u>user accessible cover member and a body member having comprising</u> a

 predefined area in which a first plurality of electrical contacts are

 positioned, the electrical wiring device including at least one element

 configured to provide electrical power to a load;

Application/Control Number: 10/680,797

Art Unit: 2833

b. a connector device configured to be positioned in contacting relation with the electrical wiring device, the connector device including a plurality of termination elements configured to terminate a plurality of wires; and

Page 5

- c. a second plurality of electrical contacts disposed in said connector device and electrically coupled to said plurality of termination elements, the second plurality of electrical contacts being configured to be placed in electrical contact with said first plurality of electrical contacts when said connector device is positioned in contacting relation with said electrical wiring device.
- 3. The following is an examiner's statement of reasons for allowance: the prior art fails to provide, teach or suggest the electrical wiring device being substantially disposed between a user accessible cover member and a body member; and in combination with other limitations in the base claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tho D. Ta whose telephone number is (571) 272-2014. The examiner can normally be reached on M-F (8:00-5:30).
